Measures to Protect Your Health While Moving in a COVID-19 Environment

May 2022

1

You are empowered to make decisions! Work with your chain of command and transportation office to reschedule your pack-out or delivery if you are not comfortable at any point during your move.

- Visit www.militaryonesource.mil/personalproperty to find the contact info for your local Transportation Office.

2

If anyone in your home tests positive for COVID-19, contact your transportation office to reschedule your shipment and/or alert others of potential exposure.

- Moving crews must present you with a completed TSP Certificate of Health Protection Protocols document before beginning work.

3

Limit the number of family members in the residence to those needed to supervise your move.

- If this is not possible, prepare a dedicated room where family members can stay while personnel are working.
- Moving companies have been directed to bring the minimum number of personnel required to handle the shipment.

4

Wear a face covering, as needed, based on local guidance.

- All moving company personnel have been directed to wear face coverings while in your residence based on community levels.
- CDC guidance on when to use face coverings can be found at <https://www.cdc.gov/coronavirus/2019-ncov/your-health/covid-by-county.html>

5

Routinely clean frequently touched surfaces.

- Customers should clean surfaces to help ensure a safer environment in accordance with CDC cleaning guidance found at https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/care-for-someone.html#anchor_1643150657
