

Navy's Three-Legged Approach for Retrograde

Technical Assistance for Repairables Processing (TARP)

- Expertise in repairables handling, packaging, & eRMS usage
- Training of Sailors & Marines
- SUP WSS contractors around the world & at sea
- Staff ATAC mobile nodes on very short notice

Advanced Traceability & Control (ATAC)

- Organization which coordinates global transportation
- Network of hubs, nodes & expeditionary "mobile" nodes
- Packaging & transshipment capabilities

Electronic Retrograde Management System (eRMS)

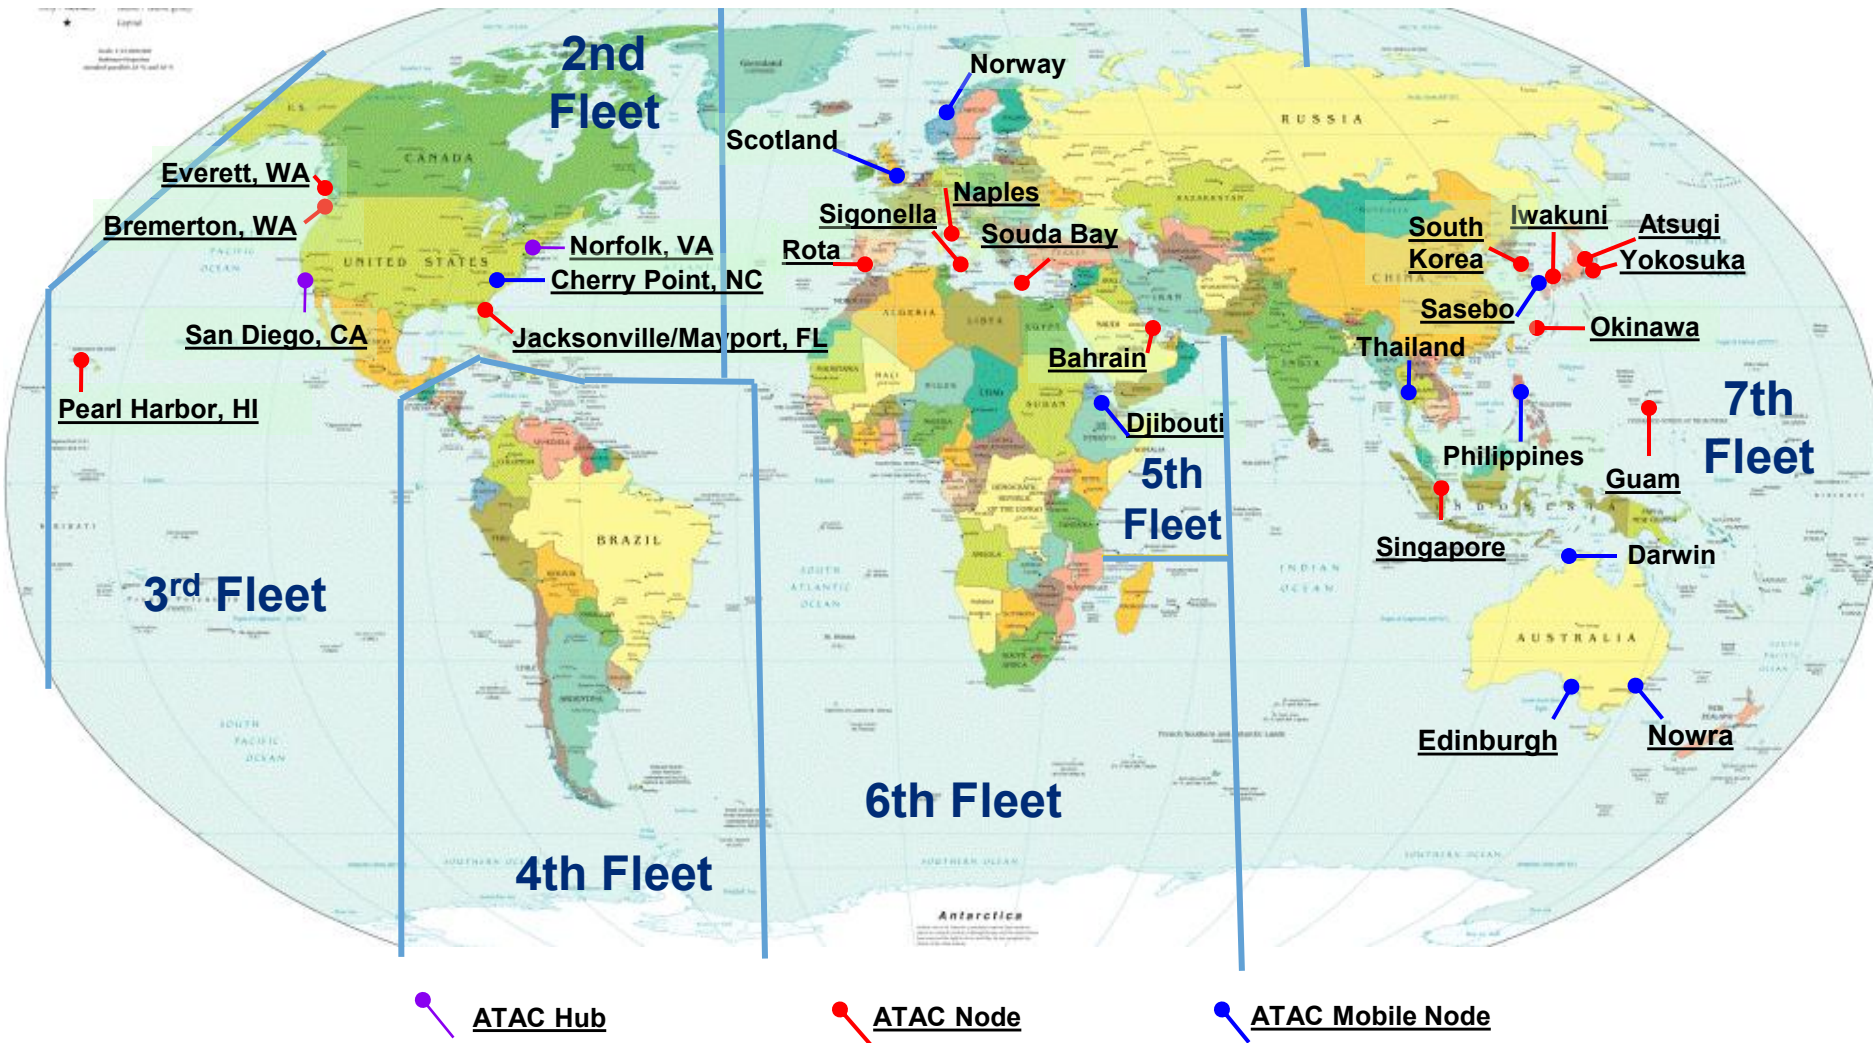

- Automated web program
- Used by warfighter in the field
- Interfaces directly to NAVSUP WSS systems
- Connects supply, maintenance, transportation, & financial processes

■ Key points of retrograde philosophy

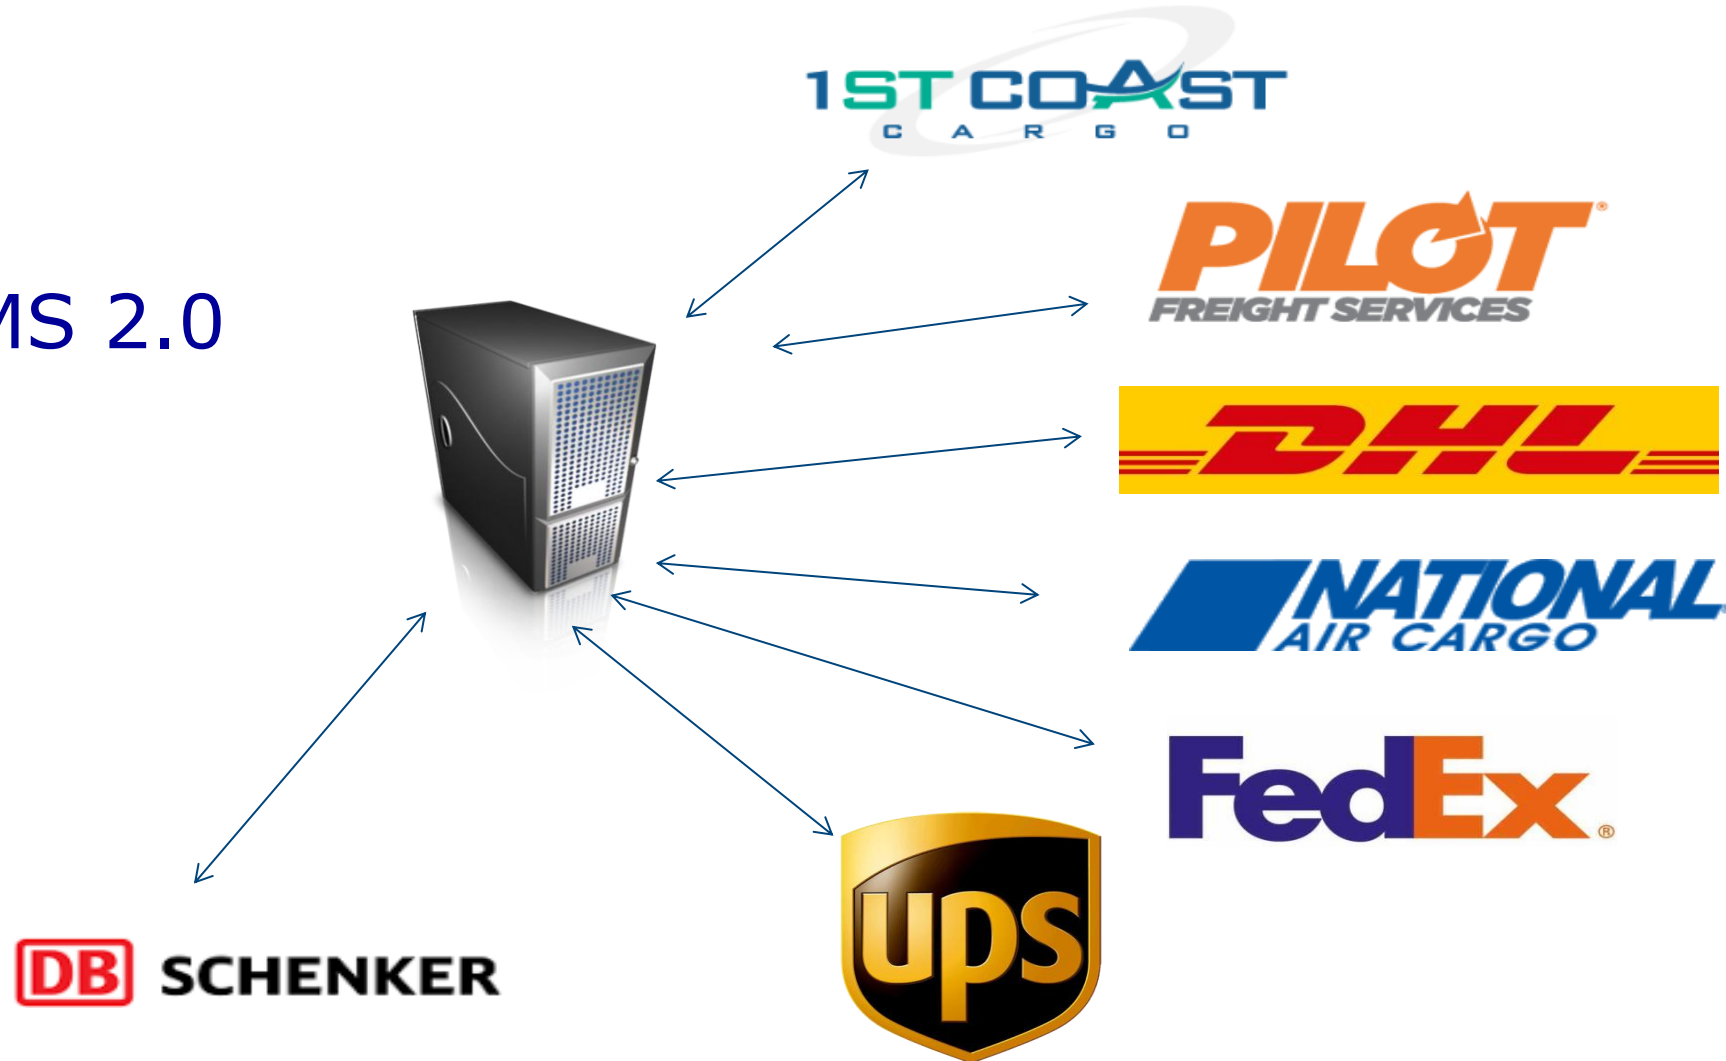

- One-for-one positive inventory control, with signature proof of delivery
- Material screening & automated disposition based on repair requirements
- Expeditious transportation... NAVSUP WSS lives on inventory velocity, not depth
- Cost-effective shipping via consolidation & commercial competition

Integration of eRMS, TARP and ATAC Key to Success

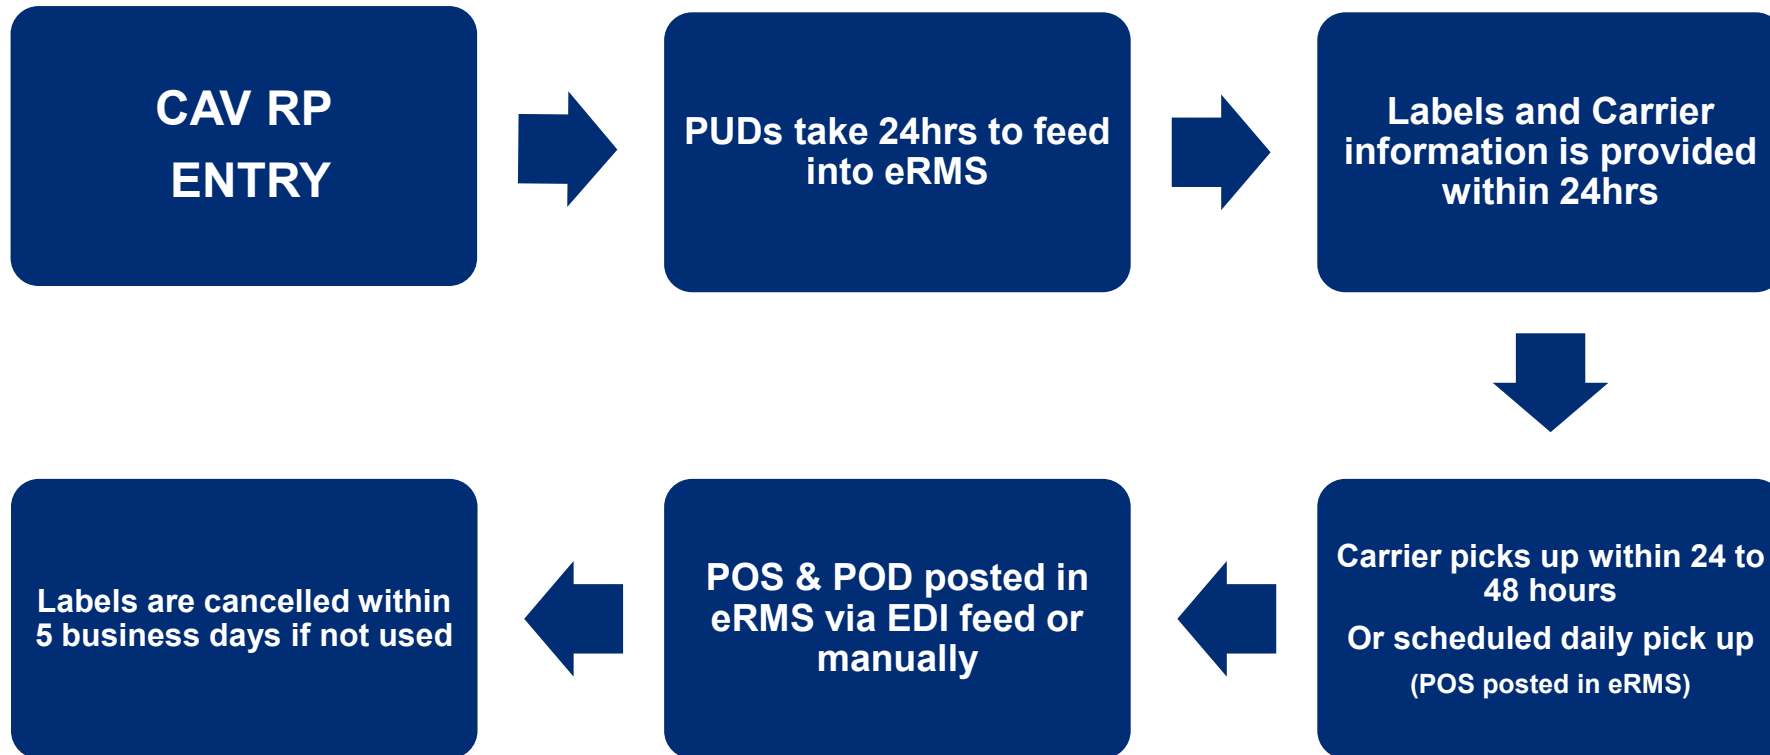

Map of ATAC Hubs/Nodes

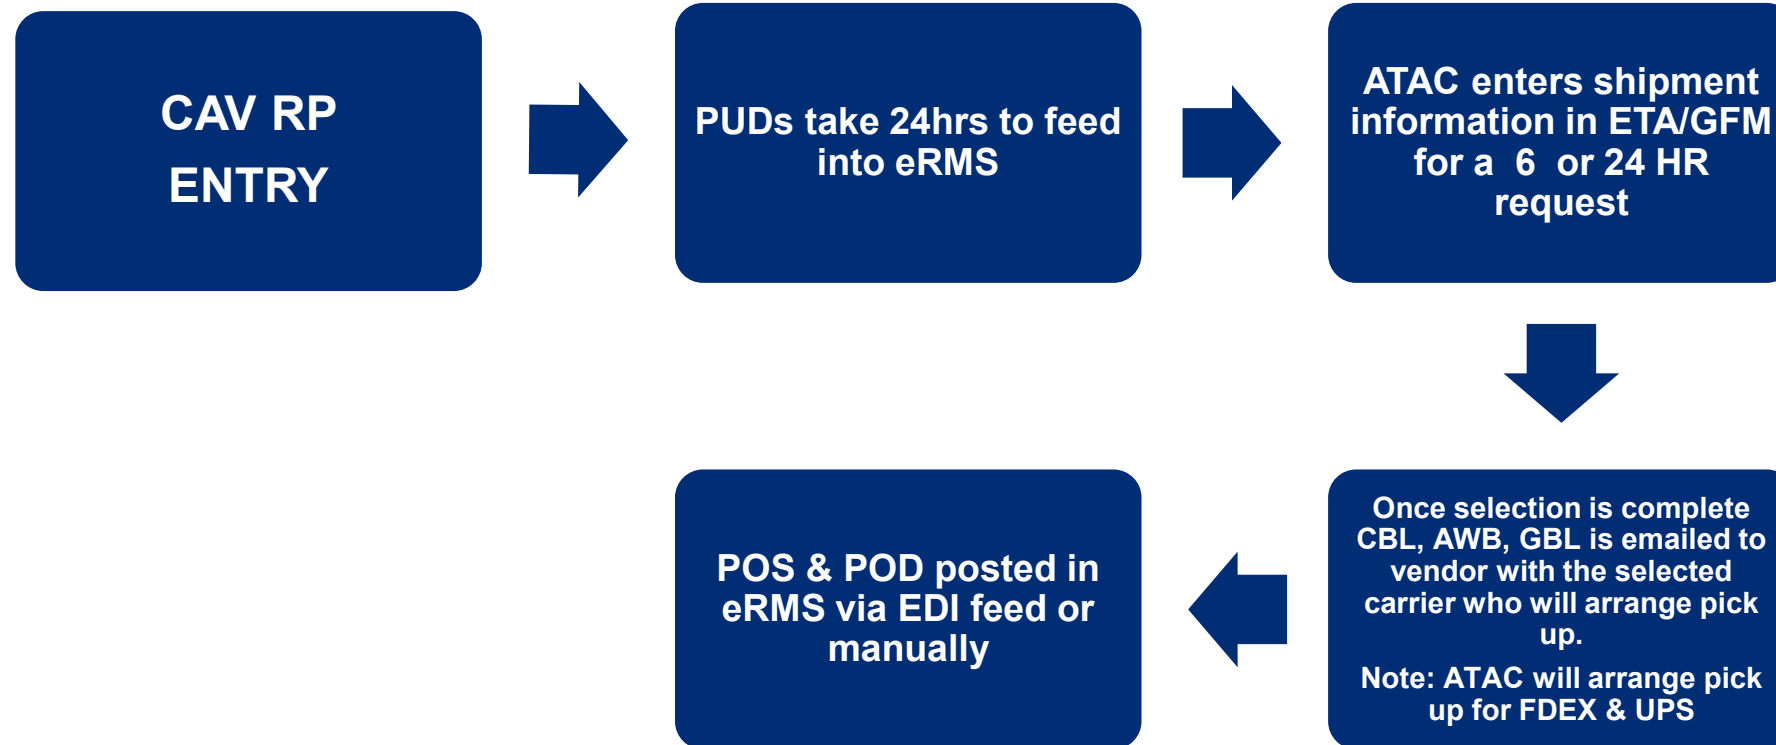

eRMS 2.0

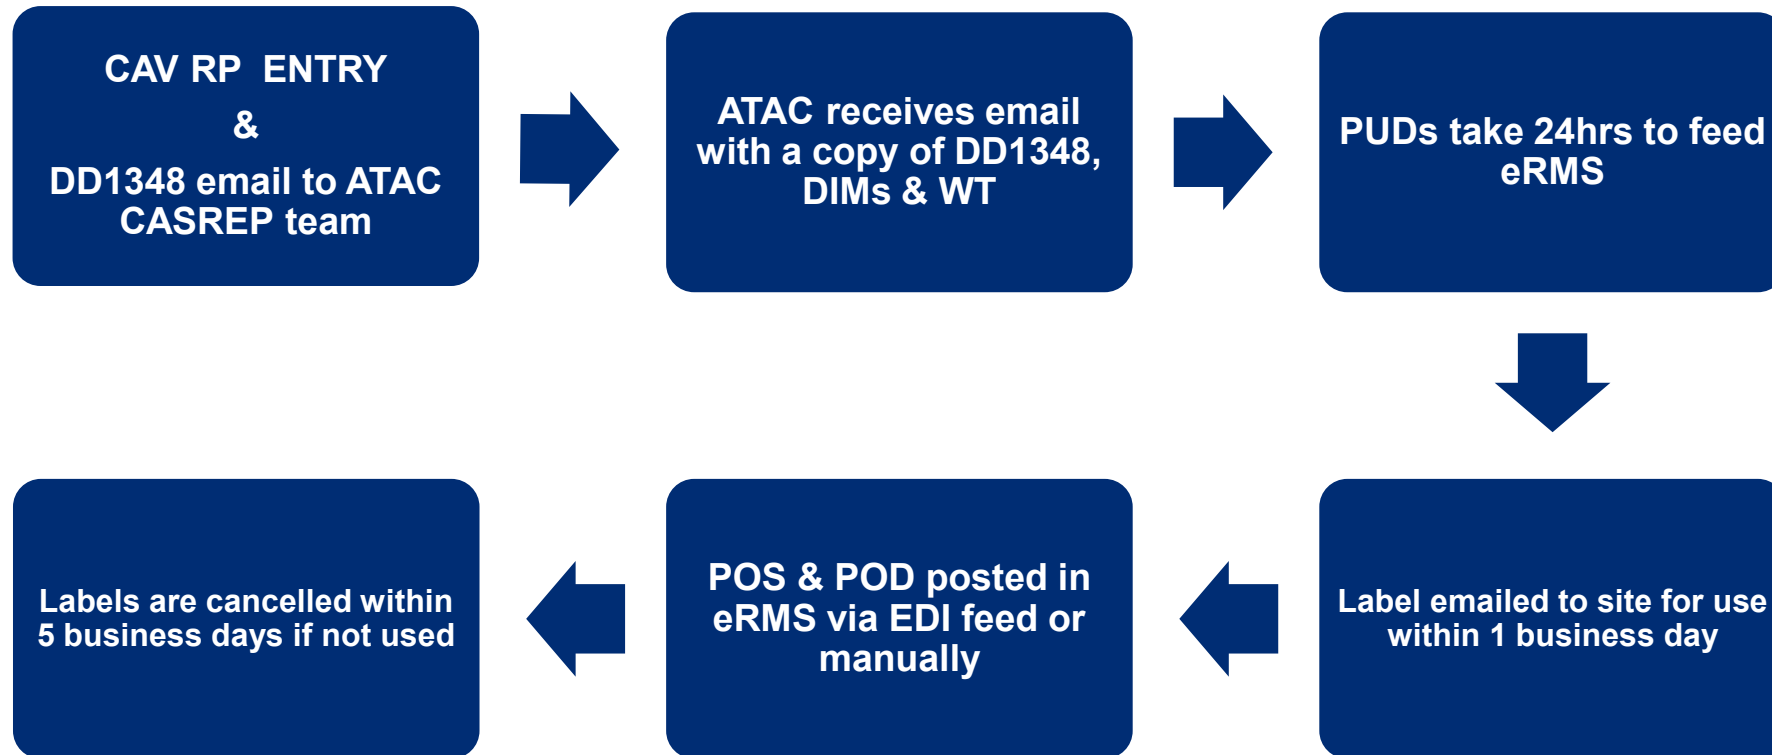

ATAC PROCESS CONUS/OCONUS Priority 6 - 13

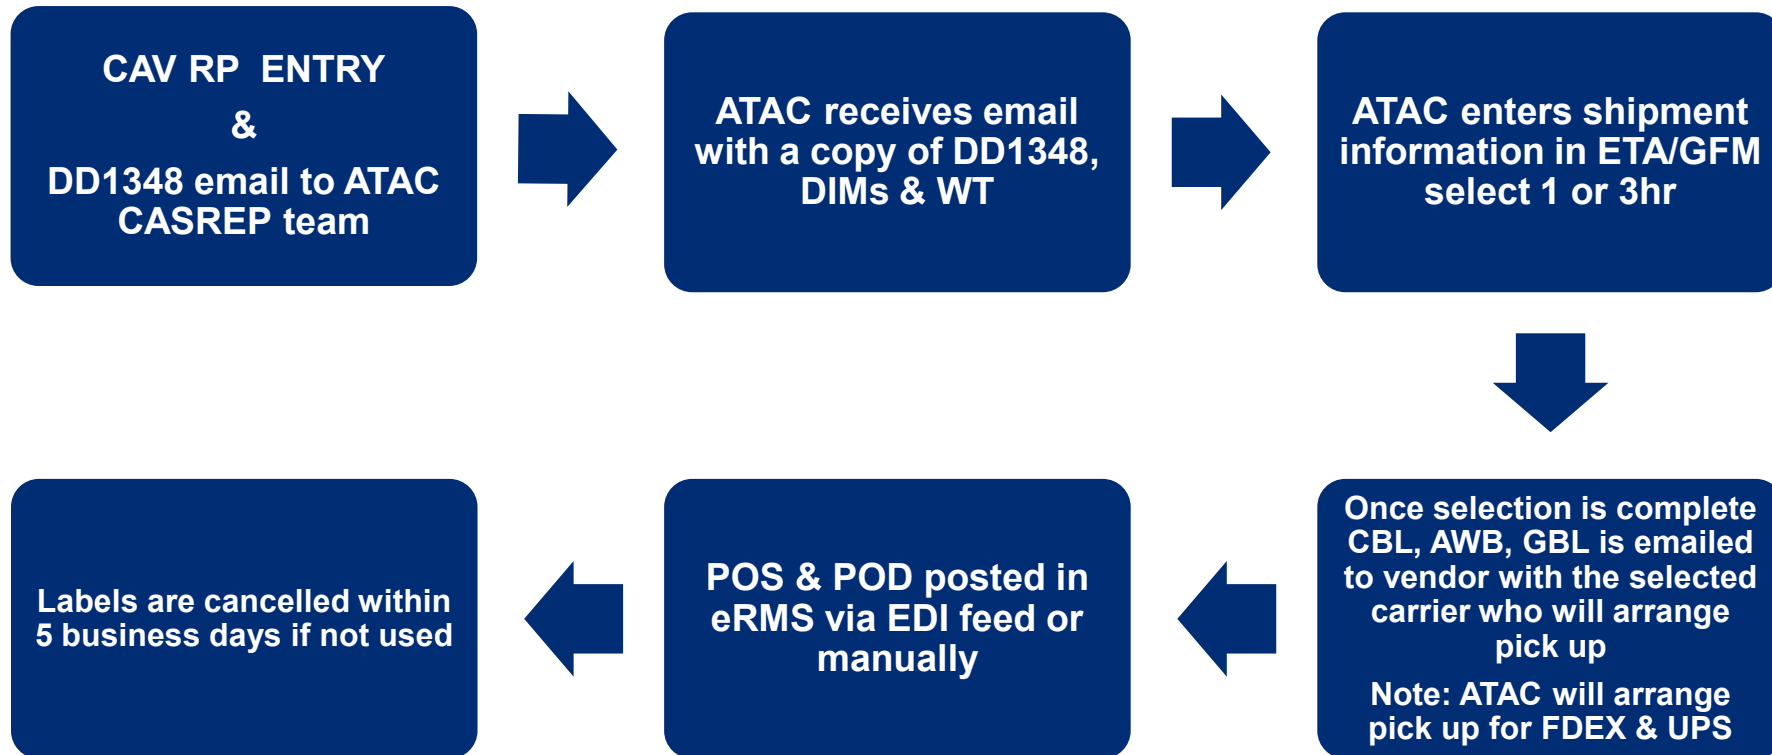

ATAC OVERSIZE SHIPMENT PROCESS (301lbs) PRI 6-13

CASREP's/Hi-Pri Shipment CONUS/OCONUS PRI 1-3

ATAC OCONUS OVERSIZE SHIPMENT PRI 1-3

1ST Coast Cargo CASREP PRI 1-3 processing

➤ Time frame for arranging pick up?

- CASREP received after 12pm will be scheduled the following day for pick up
- Shipments 151lbs and above will be moved by 1st Coast Cargo (Routine or High Priority)
- 4hr notice is required to arrange pick up

➤ Required delivery date (RDD) for shipments?

- If a specified date is entered, assets will be moved the most efficient way possible to meet the RDD
- “999” is not a valid required delivery date

Shipments To/From the United Kingdom

- Points of contacts for the UK parties verified by the ATAC, valid POCs required
- UK commercial vendor provides the Repair value of goods to ATAC (If Inbound), in order to amend/create AGR or Commercial Invoice to reflect what the vendor shows on their documentation
- ATAC will coordinate both inbound and outbound shipping with the commercial vendor POC prior to scheduling the shipment
- ATAC arranges shipment with selected commercial carrier
- Commercial carrier arranges movement from shipper to final destination

CONSOLIDATIONS

- Consolidate ALL routine items being shipped to the same destination
- Do NOT consolidate HI-PRI shipments.
- Ship in tri-wall or pallet
- Notify ATAC of the consolidation plan via email
- ATAC will provide 1 label, instead of numerous labels
- This reduces cost and time

Example of consolidation plan:

Contractors Inquiries

- Why are labels not getting send directly to commercial vendors?
 - Point of contact information is not getting properly updated

- How to contact ATAC?
 - Please email ATAC Customer Service at ataccustomerservice@navy.mil or call at (877) 846-8728 for support

- Why commercial vendors missing PUDs?
 - The CAV-RP/ERP/eRMS interface is not working properly

- Who to contact if PUD doesn't get properly loaded?
 - The CAV analyst
 - NAVSUP WSS Transportation Team

- Can ATAC ship Hazardous, Classified or Radioactive material?
 - Hazmat as long as the material is properly certified for transportation
 - Classified and Radioactive are ATAC exclusions and transportation needs to be arranged via DCMA or Local TMO
