60	7930	014233699	TOWELLETTE, SODIUM HYPOCHLORITE SOLUTION, IMPREGNATED	CHLORINE	SODIUM HYPOCHLORITE	Do not dilute	Follow Standard Precautions for Hypochlorite Solutions.
							<p>STANDARD PRECAUTIONS for Hydrogen Peroxides: Wiping is acceptable for use on hard surfaces in habitability and machinery spaces, acceptable for WIPING APPLICATION ONLY at 3% maximum concentration.</p> <p>WIPING: Acceptable on limited items (e.g. control panel switches, handwheels and operators, etc.) provided wipes are not dripping wet, are used sparingly (only once per watchstander), and the component is wiped off w/ a freshwater sponge/paper towel after decontamination to maximum extent practicable. Do not use on bare metal piping, valves, machinery, etc. Minimize liquid contact with pushbutton switches and associated gaskets on Interface Control (IC) panels to reduce risk of intrusion to internal electrical connections.</p> <p>SPRAYING/MISTING: Not acceptable due to strong corrosivity to many metals, including metals in electronic circuitry. FOGGING: Not Authorized.</p>
61	6840	016119151	DISINFECTANT, UTILITY	HYDROGEN PEROXIDE	HYDROGEN PEROXIDE	Do not dilute	Follow Standard Precautions for Hydrogen Peroxides.

SHML-AUTHORIZED COVID-19 CLEANERS/DISINFECTANTS (AS OF 11 AUGUST 2020)

The following items do not have an NSN; however, they are approved for all surface ships as COVID-19 disinfectants and may be locally procured via government-issued purchasing card.

STANDARD PRECAUTIONS for Quaternary Ammonium: These products are corrosive to steel and may degrade rubber (esp. where EDTA is part of the formula), especially in the concentrated form, so proper dilution is necessary. These statements are based on 1% maximum concentration as-used. Acceptable for use in habitability and machinery spaces when this guidance is followed: Caution is required to avoid pooling and collection of liquid cleaner on all surfaces (e.g., decks, crevices, equipment). **WIPING:** Acceptable in all spaces, with limited application in machinery spaces, namely hand-wiping of high-touch items (e.g. switches, handwheels, operators, etc.) and readily accessible hard surfaces. Apply sparingly to the wiping towel and not allowing application media to be dripping wet. Dry off component with a freshwater sponge/papertowel. Minimize liquid contact with pushbutton switches and associated gaskets on interface control (IC) panels. **SPRAYING/MISTING:** Acceptable in habitability spaces but do not allow to pool. Not acceptable in machinery spaces. **FOGGING:** Not Authorized.
